

# Reach Beyond

Your monthly update on behavioral health in Adams County.

## Greetings!

This month, we're proud to share our 2025 Annual Report, a reflection of the resilience, compassion, and collective impact that define Community Reach Center. Inside, you'll find stories of hope and healing that illustrate how our mission, to enhance the health of our community, comes to life every day through the dedication of our staff, the strength of our consumers, and the support of our partners.

Over the past year, we expanded access to care, most notably through the opening of our Walk-in Crisis & Resource Center, providing 24/7 support to individuals and families when they need it most. We continued to meet people where they are, across outpatient clinics, schools, residential programs, and community spaces, serving thousands of adults, children, and families with compassionate, consumer-centered care.

This report is more than a summary of numbers or programs; it's a snapshot of what's possible when a community comes together around mental health and well-being. We invite you to explore the full report, celebrate the impact we're making together, and join us as we continue building a healthier, more connected future for our community.

## Mental Health Minute: Black Mental Health

Race is central to identity, lived experience, and mental health.

A person's mental health and well-being can be impacted by cultural and societal group identities such as race, ethnicity, and socioeconomic status. Focusing on Black mental health allows us to highlight the unique intersection of these experiences.

It is important to note that the mental health of Black people is not challenging because of that identity itself, but because of the systemic issues faced by this community. Read the article below to learn more.

## Partner-Oriented: Community in Action

At Community Reach Center, recovery and wellness extend beyond our walls. This month, consumers and staff from our A.W.A.R.E. Center came together for a community clean-up as part of our Adopt a Street Program with the [City of Thornton](#). Through community service, individuals had the opportunity to strengthen connections, build confidence, and contribute to a cleaner and healthier neighborhood for everyone. We are proud to create spaces where people not only receive support, but can work together to give back and actively engage in their community.

Earlier this month, we hosted an Adult Mental Health First Aid (MHFA) class in Lafayette. Eighteen community members from diverse professional backgrounds came together to strengthen their ability to recognize and respond to mental health challenges in their community. The diversity in the room reflected a shared commitment to identify signs of distress and respond with compassion, care, and understanding. Are you interested in getting trained?
